

The PRISM Mathematics Curriculum Team

Mission Statement

We will identify opportunities in UGA mathematics, mathematics education, and statistics courses to highlight connections and ideas that help prepare teachers to teach algebra, geometry, and statistics in an integrated, standards-based approach.

Goals for 2007-2008

- ❖ Develop units of instruction based on Math 1 and 2:
 - Finish writing units that will be taught in mathematics education courses by the fall of 2008.
 - Review units in the Math 1 Frameworks for inclusion in UGA courses.
- ❖ Share the vision of the new state curriculum:
 - Publicize our open letter of support for integrated mathematics.
 - Offer conference presentations on preparing teachers for integrated mathematics.
 - Arrange a colloquium in the mathematics department featuring the Georgia Performance Standards (GPS) for faculty and students in mathematics, mathematics education, and statistics.
 - Provide at least 2 collegial lunches for faculty in the departments of mathematics, mathematics education, and statistics as venues for discussing the GPS.
