Overview of the Course, purposes:

This course is an examination of education in the United States, particularly public school education, to provide insights into the history of development of American education as well as the contemporary reform landscape of imperatives, persistent problems, dilemmas, and opportunities that are most pertinent to students planning to enter the teaching profession. We shall examine historical, sociocultural, political, economic, and philosophical aspects of American education, considering its unique and universal features, in global a perspective. We shall survey the different periods in the development history, and the different perspectives on whose interests are served by American education. A major thrust of the course will be to examine issues and dilemmas in past, present, and future education and the roles of teachers, students, communities, government, and special interests. Issues and challenges related to the dominant culture, dominated and dispossessed groups, equality/inequality, and diversity will be other major threads running through the course. For students contemplating a career in teaching, in any field, this pre-education course provides a broad overview of the evolution of the American public education system, and of the issues and challenges--the realities that teachers face in schools in Georgia and elsewhere, in lights of contemporary developments in society and locale realities that impact schools and teaching, and an overview of teacher-issues and reform mandates that impact teaching. The course is NOT a methods course focusing on teaching methods and curriculum (these are part of the various teacher education programs). **Students should view this course as an opportunity to reflect on your own schooling experience, on teaching as a career and to begin reflecting on the challenges and opportunities they will face in the classroom as teachers.**

Objectives for the course:

- a)Cultivate an awareness of the complexities of education in the United States; drawing from personal experience and course material.
- b)Examine the diverse roles, purposes, and outcomes of education in historical context.
- c)Consider the diverse educational experiences on different groups in American society.
- d)Contemplate the realities facing teachers, students, and communities regarding reform mandates, local development and change issues, and aspects of the teaching profession.
