ESCI 4100: Laboratory Internship Reflection Seminar Fall 2009

INSTRUCTORS:

Michael P. Mueller, Ph.D.
Mathematics and Science Education
The University of Georgia
212 Aderhold Hall, Athens, GA 30602

Marshall Darley, Ph.D.
Biological Sciences
The University of Georgia
212 Aderhold Hall, Athens, GA 30602

TIME:

Fall Semester
Wednesdays, 2:30-3:20
August 26 – December 2, 2009
Room: 4403 Miller Plant Sciences Bldg.

Recommended materials: Digital camera

Syllabus is subject to change depending on the dynamics of the class and instructors.

COURSE DESCRIPTION:

The purpose of the reflection seminar is to assist the participating students in developing knowledge of the craft of teaching during an internship in the teaching laboratory. We created this experience to assist science students in gaining experience during their undergraduate careers. We also believe that the teaching interns play an important role in aiding the learning of the undergraduate students in the laboratories.

ACADEMIC HONESTY:

The University of Georgia seeks to promote and ensure academic honesty and personal integrity among students and other members of the University community. In keeping with the University Honor Code and Academic Honesty Policy, each student is expected to do his/her academic work and to acknowledge fully any assistance and academic resources. All academic work must meet the standards contained in "A Culture of Honesty." All students are responsible to inform themselves about those standards before performing any academic work. Terms of this policy, resolution procedures, and consequences of violation are available at:

http://www.uga.edu/ovpi/academic_honesty/culture_honesty.html

REQUESTS FOR MODIFICATIONS:

It is policy of the University of Georgia to make reasonable accommodations for qualified individuals with disabilities. If you are a person with a disability and want to request accommodations to complete your course requirements, please make an appointment with the course professors as soon as possible to discuss your request. For information on documentation requirements, contact the office of Disability Services (2-8719).

NOTES ON CLASS DISCUSSIONS:

This course welcomes a caring style with respect to conversation and interaction with peers. A caring style encourages paraphrasing of others' thoughts and asking questions as a way to offer interest and attentiveness. A caring style offers compassion when others are frustrated. A caring style offers support for ideas to obtain clarity prior to critique. A caring style monitors their time so that they are not monopolizing the conversation--allow quieter others to voice their positions. A caring style is responsible to others to ensure that the current topic is given enough attention. Contrasting views are also appreciated and help to clarify others' ideas--so offer contrasting views when appropriate but in a constructive and inclusive way that permits effective exchanges.

ASSIGNMENTS PROFICIENCY AND SUMMARY:

Assignment proficiency is meeting 90% of the required expectations for completing assignments (rubrics). Assignments may be re-completed to meet the proficiency requirements for this course.

The reading schedule, activities, and assignments rubrics will be negotiated with the class.

Overview of Assignments:

- 1. Attend the laboratory to which you are assigned each week. Prepare for your activities in the teaching laboratory in consultation with the assigned TA and other staff. Although you are not technically working for them, you should only prepare the teaching activities that you are directed to prepare after consulting with the TA or other staff.*
- 2. When assigned to do so, you will take the primary responsibility for teaching the laboratory section. In some cases you will be observed and evaluated by the TA, professors in the course, and other staff/faculty.*
- 3. Attend the preparatory session conducted each week for the laboratories.*
- 4. Attend the reflection seminar each week. You are asked to contact Dr. Mueller by email (mmueller@uga.edu) if you cannot attend. You are asked to participate in the discussion conducted during the reflection seminar and design several photoessays on your experiences in the teaching internship. Further direction on these presentations will be given later.*
- 5. Participate in a final evaluation session with the professors of the course.*
- 6. Present at least one of your photoessays in class, which describe your experiences in the laboratories.*

Assignment Details:

Photoessay #1

The first reflective photoessay will be a time for each of you to describe the activities in which you have been engaged as a Laboratory Training Intern, your experiences including beliefs about these experiences and the plan you have made for the future. If you decide to present this photoessay, it should be a presentation of no more than 5-10 minutes. PowerPoint presentation formats are encouraged but other documents such as Microsoft Word can be used to construct the photoessay.

- Examples of photoessays will be discussed in class prior to your assignment.*
- You will describe the experiences you have had while conducting yourself as a laboratory teaching intern, preparing for your duties as a laboratory teaching intern, or reflecting on your experiences as a laboratory teaching intern.*
- Photographs accompanied by your notes are strongly encouraged for this assignment, as a reflective practice.*
- You will use the rubric we discussed in class to ensure that your reflection does not deal solely with a chronological listing of the facts related to your participation ("book report").*
- You should thoroughly edit your work so as to remove grammatical and typographic errors.*
- You should be prepared to present and discuss your photoessay in class at some later point.*
- I hope you will find this assignment useful in thinking about how the second half of the semester will be conducted to optimize the benefits to your own learning about teaching and to the learning of your students.*

The first assignment will be due October 7, 2009. Please submit it electronically. Feel free to contact me if you have questions.

Photoessay #2

Describe an incident in which you learned the most about teaching. Select this incident from the photos taken throughout the semester. Go into depth on the nature of the interactions with other individuals that happened and identify what you believed before about teaching and what you came to believe afterwards. What about this event made it more significant than the dozens of other moments in teaching? Was this a positive moment or a negative moment? This assignment is due on the last meeting of our seminar. Again this assignment will be submitted electronically. Submit by November 18, 2009.
