**Course Requirements:**

1. I expect regular attendance and will take excessive, unexcused absences (missing more than 6 hours of a 3 credit-hour course) into account in the final course grade.
2. I expect people to come to class prepared and to contribute to class discussions and activities. Frequent lack of preparation or failure to contribute will also be taken into account in the final course grade.
3. All students are required to use the WEBCT services that support this course. Some course material will be available only on the course WEBCT site. We will be emailing one another for individual and group purposes using this site. Assignments are to be submitted on the WEBCT site.
4. Review the UGA incomplete policy at this website: <http://bulletin.uga.edu/bulletin/acad/Grades.html>. Only students who complete work on schedule are eligible for a grade of A- or A.
5. Assignments:

86-83 = B	69-60% = D
82-80 = B-	below 59 = F

**Course Objectives:**

1. Students can compare and contrast, through an illustrative diagram, major forms of qualitative data and assess them for credibility, authenticity, reliability, and validity: observational field notes, interview and questionnaire transcripts, public and private documents and other participant artifacts, and film, tape, and photograph records.
2. Students can chart and relate conceptual and theoretical frameworks from the social sciences that have informed qualitative data analysis in educational research.
3. Students can match qualitatively formulated research problems and questions with appropriate selection and sampling procedures and appraise these procedures for how they affect qualitative data collection and analysis.
4. Students can generate credible units from narrative and visual data and develop categories from the units by comparing, contrasting, aggregating, and ordering the narrative and visual data. They can generate properties of the categories from the data and integrate the categories conceptually and empirically.
5. Students can specify, describe, and apply the variety of sequential selection methods used to formulate constructs during simultaneous collection and analysis of qualitative data: negative case selection, discrepant case selection, theoretical sampling, and Campbell's (1979) theory-implications method.
6. Students can generate provisional descriptive, correlational, or causal relationships among the categories derived from narrative and visual data by demonstrating time orders, covariances, and eliminations of rival hypotheses.

7. Students can synthesize an analysis of qualitative data by presenting it in a chronological or thematic case example or case history, in an essay formulated around topics or theses, or in an alternative format appropriate to the analysis.
8. Students can interpret a qualitative analysis within its appropriate conceptual, theoretical, and empirical frameworks.

### **University of Georgia Academic Honesty Policy:**

All of us are expected to abide by the standards for academic honesty adopted by the university. Learning to appropriately quote and paraphrase and to cite and attribute sources is a skill that is key to honest and creative scholarship. I expect all students to review the guidelines at the website <http://www.uga.edu/ovpi/honesty/acadhon.htm>. If you have questions about what would be considered violations of the standards, please raise them in class or ask me.

*“All academic work must meet the standards contained in “A Culture of Honesty.” All students are responsible to inform themselves about those standards before performing any academic work”* (from page 1, Course Syllabus Policy, Academic Affairs Policy Statement Number 13, University of Georgia).

### **Accommodations for Qualified Individuals with Disabilities:**

University of Georgia policy is to make reasonable accommodations for qualified individuals with disabilities. Please let me know if you have a disability request.

### **Need for Editorial Assistance:**

Requirements for the course depend on substantial writing. Students who need editorial assistance, such as some individuals who are not native English speakers, are encouraged to make such arrangements. A good place to start is the UGA Writing Center: <http://www.english.uga.edu/writingcenter/>.

### **Nature of This Course**

Qualitative research on human experience often involves controversial topics. People have strong feelings, values, and beliefs that affect how they interpret scientific and other scholarly information. Although diversity of opinions is central to the scholarly inquiry encouraged in this course, everyone is expected to accurately represent the variety of views discussed. We may agree to disagree, but we must be able to express the viewpoint with which we disagree. Sound scholarship depends, then, on respectful listening and sometimes respectful disagreement.

### **Instructor:**

I can be reached by telephone at 542-6489, by e-mail preferably through WebCT or alternatively at [jude@uga.edu](mailto:jude@uga.edu), and in my office, River’s Crossing 303 before classes and by

appointment. Preissle is pronounced price-lee with the accent on the first syllable. I work in the qualitative research program here at the University of Georgia as well as in the College of Education's social foundations of education program. My degrees are an A.B. in history from Grinnell College in 1964 and an M.A. (University of Minnesota) in 1971 and an Ed.D. (Indiana University) in 1975, concentrating in anthropology and education. My scholarly interests and publications focus on sociocultural theory, gender studies, classroom social life, immigration and education, and qualitative research design. My personal interests include books, music, gardening, birding, miniature schnauzers, and ballroom dancing.

*\*“The course syllabus is a general plan for the course; deviations announced to the class by the instructor may be necessary”* (from page 1, Course Syllabus Policy, Academic Affairs Policy Statement Number 13, University of Georgia).
