**SPED 4200: Advanced Instructional Methods for Individuals with Mild Disabilities
Course Syllabus
Fall 2006**

Instructor: Amy D. Spriggs, M.Ed.
Email: aspriggs@uga.edu
Office hours: By appointment only. I will remain after class for any questions.
Location: Aderhold 119
Class hours: Tuesdays and Thursdays 12:30 – 1:45
Required Text: Schloss, P.J., Smith, M.A., Schloss, C.N. (2001). Instructional methods for secondary students with learning and behavior problems. (3rd ed.). Needham Heights, MA: Allyn

Please note that there may be additional readings assigned by the instructor during the course

Prerequisite: SPED 4100 and permission of department.

Course Description

This course is designed to complement SPED 4100, a core course offered during the junior year for undergraduate special education majors. Like SPED 4100, this course focuses on the practical application of instructional methods for students with or at-risk for high incidence disabilities. Students enrolled in this course will be expected to (a) demonstrate knowledge of the theoretical frameworks underlying instructional practices that have been shown to be effective for students with mild disabilities, (b) select appropriate accommodations and modifications that support learners with special needs in content-area classes, (c) identify modality strengths and weaknesses and match them to appropriate instructional strategies, and (d) develop a case study based on a learning profile of a student with a high incidence disability.

General Considerations

1. **REGULAR ATTENDANCE** is required for all class meetings. Students are responsible for information covered in assigned readings, handouts, discussions, and activities. Attendance is emphasized to ensure that students receive opportunities to (a) improve their knowledge through discussions of critical topics and issues, (b) practice skills needed to engage in professional dialogue/exchange with colleagues, (c) present information to others, (d) acquire information from lectures and presentations, (e) participate in course-related activities, and (f) submit required assignments. Student attendance affects grades via a response cost. Students lose a participation point for classes they miss, arrive late, or leave early. Students who miss more than four class meetings will be dropped from the course enrollment.

2. Like the instructor, students are expected to come to class meetings **THOROUGHLY PREPARED**. "Thoroughly prepared" is defined as having read all pre-assigned readings sufficiently to verbally and in writing (a) discuss definitions, concepts, issues, and procedures and (b) relate this information to content presented in previous classes or readings. The implication is that students have reviewed information from previous readings and class meetings. Students are responsible for preparing and presenting questions when information from readings or class meetings is unclear.
3. All assignments must be submitted **ON OR BEFORE THE ASSIGNED DUE DATE**. Unexcused assignments submitted after the due date may be returned ungraded or will be assigned a lower evaluation. Prior notification is required for excused late assignments.
4. **ALL WRITTEN ASSIGNMENTS** must be prepared in a **PROFESSIONAL** manner. "Professional" is defined as following guidelines stated in the Publication Manual of the American Psychological Association (5th ed.) (2001). All final products must be typed. Products that, in the judgment of the instructor, are unreadable or unprofessionally prepared will be returned ungraded or assigned a lower evaluation.
5. **DO YOUR OWN WORK**. To plagiarize is "to steal and pass off as one's own the ideas or words of another" (Webster, 1967, p. 646), or to not acknowledge the author of an idea. If plagiarism is evident, the student may receive zero points for the assignment, and/or a grade of "F" for the course, and may be expelled from the University. **Academic Integrity:** The University of Georgia seeks to promote and ensure academic honesty and personal integrity among students and other members of the University Community. A policy on academic honesty has been developed to serve these goals. All members of the academic community are responsible for knowing the policy and procedures of academic honesty. Please see the following web site for complete details: (<http://www.uga.edu/vpaa/polproc/ahpol/main.html>).
6. Final course grades will be based on the number of points accrued from the submission of required products, minus points deducted for absences, late arrivals, and early departures.
7. The assignment of **INCOMPLETE OR "I" GRADES** is discouraged and will be used only in cases of extreme emergencies where satisfactory progress has been demonstrated and a passing grade may be earned. In the event that an "I" grade is appropriate, students should notify the instructor at the time such circumstances arise. Upon notification, a course completion contract between the student and instructor will be developed before the last week of the quarter.
8. Students with disabilities who anticipate a need for special accommodations in this course should meet with the instructor early in the semester.

Course Activities and Requirements for SPED 4200

1. **Preparation, Participation and Professionalism:** Students are expected to come to each class on time and thoroughly prepared. While in class, students are expected to actively participate in class discussions, activities, etc. For each class a student misses, arrives late, or leaves early, one point will be deducted from their final grade. There are no opportunities to “make-up” missed points. Missing one class will not jeopardize a student’s final grade in this course.
2. **Quizzes:** There will be four quizzes over the course of the semester, each worth 10 points of the final grade for a total of 40%. These quizzes will vary in format to include multiple choice, short answer, and essay. One quiz will be take home and will consist of more detail. The final quiz will cover cumulative material to encompass the entire semester.
3. **Input/Output Project:** There will be a learner input/output project that will focus on a learner’s strengths and weaknesses and appropriate accommodations and modifications for mainstreaming. This project will be worth 15 points, or 15% of the final grade. Assignment will be given out at a later date.
4. **Case Study:** You will be provided with a profile of a student and asked to identify learning strengths and weaknesses, possible educational impacts of her disability, behavioral concerns and recommendations, parental advice, regular education guidelines, and specific strategies that focus on her learning strengths. As a class, we will step through this process together and you will be provided with an opportunity to “practice” with a small group prior to completion of your final project. This case study is worth 20 points, or 20% of your final grade. Assignment will be given out at a later date.
5. **Chapter Project: Modifying Content Area Text Materials:** Students will organize and apply a series of instructional techniques to promote student mastery of salient information and acquisition of critical-reading study skills in a general education content-area textbook. This assignment is worth 20 points, for a total of 20% of the final grade. The product for this assignment will serve as a required artifact for the program portfolio in special education. A task analysis of this assignment, as well as the criteria for evaluation, are included on pages 8 and 9 of this syllabus. Assignment guidelines are attached.
6. **Make and Take:** The purpose of this activity is to share an effective teaching tool with your classmates (an example will be provided for you). Your teaching tool can be anything that might be used with students with disabilities (so you can look at academics, behaviors, social skills, etc.). You will need to be prepared to demonstrate how your teaching tool would be used in a classroom in a BRIEF (5 to 7 minute) presentation. You will need to bring enough “samples” to share with your classmates. If it is simple, you can have your classmates actually make the teaching tool used – if not, they will need to be prepared ahead of time. Along with each “sample” tool, you will need to have a one page written description of the teaching tool, materials needed to duplicate the teaching tool, what types of students would benefit from using it, variations, and/or a sample lesson plan where you might see this tool used. The written portion of this assignment needs to be directed toward teachers who might want to use this teaching tool in their classroom. (you need to include enough copies for everyone to file away with your sample). This activity will be worth 5 points, or 5% of your grade.

Monitoring your Progress

Below is a table of course assignments, their tentative point values, and relative weight for determining your final grade at the end of the semester. You may use this organizer to track your progress. One way to determine an assignment's potential influence on your final grade is to convert the raw points you earn into the number of percentage points the assignment is worth.

Course Assignment	Relative Weight	Points Toward Final Grade
Preparation, Participation and Professionalism		- _____
Quiz 1	10%	_____/10
Quiz 2	10%	_____/10
Quiz 3	10%	_____/10
Quiz 4	10%	_____/10
Input/Output Project	15%	_____/15
Chapter Project *	20%	_____/20
Case Study	20%	_____/20
Make and Take	5%	_____/ 5
FINAL GRADE	100%	_____/100

*This assignment will serve as a required component of your program portfolio.

Tentative Agenda for SPED 4200

Wk/Date		Topic	Readings	Due
R	8/17	Introduction, Review of Course Syllabus, and Needs Analysis		
1 T	8/22	Learning Disabled for a Day	Handouts	
R	8/24	F.A.T. City Video	Handouts	
2 T	8/29	Foundations of Secondary Sp.Ed.	Ch.1	
R	8/31	Postsecondary Service Options	Ch.2	
3 T	9/5	Challenges of Adolescence	Ch.3	
R	9/7	Quiz 1 / Introduction of Input/Output Project		Quiz 1

R	11/16	Social Skills, cont'd	Handouts	
14 T	11/21	Student Choice		
R	11/23	THANKSGIVING HOLIDAYS		
15 T	11/28	Make and Take		Make and Take
R	11/30	Make and Take		Make and Take
16 T	12/5	Catch-Up Day / Student Questions		Case Study Due
		Final Quiz		Quiz 4

Modifying Content-Area Text for At-risk Learners

Your product for this assignment will serve as a required artifact for your program portfolio in special education. You will organize and apply a series of instructional techniques to promote student mastery of salient information and acquisition of critical-reading study skills in a general education content-area textbook.

Preparing for Instruction

1. Select a chapter of interest from a secondary content-area text (e.g., science, social studies, health, history). Provide the name, publisher, and publication year of the textbook that your chapter is taken from. Also provide the intended age/grade level of the book. A copy of the chapter must be submitted with your assignment.
2. Read the chapter carefully. Determine the critical concepts, vocabulary, general understanding, facts, etc. that you want students to gain from reading the chapter and indicate those as objectives for your lesson(s).
3. Develop or adapt a test for the chapter. Your test should focus on critical content and use appropriate items to measure student mastery of that content. If you decide to modify/adapt a pre-existing test, submit a copy of the original version with your assignment.

4. Divide the chapter into teachable segments. Segments are usually a series of related paragraphs. Be certain that each segment represents connected (related) material about the overall chapter/topic. Ideally, a segment can be taught in one class session. Should you determine that time/ amount of content in any of your segments would prohibit presenting everything in one class, indicate how many class sessions you would use to teach that segment. You may simply indicate the segment divisions (i.e., draw lines) in the copy of the chapter you submit.

Pre-reading Activities

5. Within each segment, identify the words that you anticipate would be difficult for your students to decode. List those words and indicate how you would introduce their pronunciation (e.g., whole word approach [a.k.a. "sight word"] pre-correcting affixes, indicating parts of the word).
6. Design a concept map that could be used visually to present a critical vocabulary content. The structure of your map should match the structure of the content you wish to convey (e.g., hierarchy, diagram, compare-contrast, timeline, or process/cycle).
7. Select one segment from your chapter and write questions that could be used in a guided reading procedure.

Post-Reading Activities

8. Prepare a set of questions that students can complete after they've read the entire chapter (all segments). Your questions should focus on the critical concepts delineated in your content analysis. Note: These questions are not your "test." Their purposes are to (a) provide an indication of whether the students understood the critical content and (b) allow you to offer additional instruction as needed prior to the test.
